Our line includes natural fibers for dyeing, clays for throwing, paint for mixing, and nuts for grinding. You have many different options available, like a hand-painted coloring book for your kids, drawing pads for your grownups, and craft supplies for everyone. Be sure to check out our Crib Sale page for tons of free baby art supplies. For wholesale orders and larger bulk purchases, please call us at 972-822-8388 \*\*Please call if you are interested in wholesale, local pick-ups or large bulk orders\*\* the new electron-hole pairs. The location of the polymer chain in the glass matrix was clearly demonstrated by the addition of an additional  $\text{Ru}(\text{bpy})_3^{2+}$  to the polymer solution. The electronic properties of the PIC:PC system have been investigated by linear and non-linear Raman scattering experiments carried out on the frequency-downshifted Raman bands. The results of the linear and nonlinear response spectra are consistent with the formation of an excitonic complex composed of the electron-hole pairs of the  $\text{Ru}(\text{bpy})_3^{2+}$  and the PIC units. The possible mechanism of this complex formation is explained in terms of photoinduced electron and hole transfer processes. The spectra were also analyzed in terms of two-level intensity-intensity correlation function technique to extract the absolute parameters of the exciton complex. The process involving energy transfer in the system under investigation was also modeled in terms of a two-level intensity-intensity correlation function technique. Electronic supplementary material ===== (#Sec12) Supplementary information \*\*Electronic supplementary material\*\* \*\*\*Supplementary information\*\* accompanies this paper at 10.1038/s41598-018-27212-3. \*\*Publisher's note:\*\* Springer Nature remains neutral with regard to jurisdictional claims in published maps and institutional affiliations. The authors are thankful to the Scientific and Technological Research Council of Turkey for the financial support (TÜBİTAK Project No. 2232). A. Ercan and H. Unal also would like to thank the financial support of Erciyes University. We thank Dr. Dimitrios Melas for the kind gift of  $\text{Ru}(\text{bpy})_3^{2+}$ . A.E. and A 82157476af
