Download

Image Processing Lab is a free application designed to work with pictures from your hard disk, including JPEG, PNG, TIFF, BMP and GIF formats. It allows you to view and edit pictures in lots of different ways. Furthermore, you can also convert pictures from one format to another, or convert just one or more channels of an image (RGB, GRAY, B&W). It also has basic image processing tools, including clone, flip, flip

horizontal or flip vertical, rotate, rotate clockwise or counterclockwise, crop and resize. Image Processing Lab Shortcuts You can view the pictures you have on your hard drive in a new window with a thumbnail preview, or view them all in a single window. The second option allows you to go through your pictures one by one, and therefore, you can easily find the one you are looking for. Image Processing Lab supports both of these options, and also, enables you to

convert pictures from one format to another. The format conversion is also done individually, allowing you to change a wide range of formats. One of these is the raw BMP format, which can be converted to JPEG, PNG, GIF, TIFF and PCX. Besides that, you can convert RGB to CMYK, RGB to greyscale or any other color to gray. Image Processing Lab allows you to change the brightness, contrast and saturation level of the pictures. Moreover, the tool can invert

colors or add a sepia or grayscale effect. Moreover, you can control the brightness, contrast and saturation levels of the pictures. Image Processing Lab includes more advanced options as well, such as the ability to zoom in or out, flip pictures, rotate and crop them. Image Processing Lab is a free application, and therefore, it is absolutely safe for use. The program does not do any kind of damage to your computer. It also boasts a clean design, and the interface is well thought out.

The layout is not complicated, as you can access the different features of the software with no problem. Image Processing Lab license Key Features: Download with a single click Simple installation View and edit pictures Change picture brightness, contrast, and saturation Convert to JPG, PNG, TIFF, BMP and GIF Create JPG, PNG, TIFF, BMP and GIF files from your pictures Save and print pictures Change picture contrast Add an effect to your pictures Filter image blobs Find
