This project consists of following main components: * SQLWizard Tool * SQLServer.DLL * SQLServer.OCX * SQLServer.manifest * SQLServer.bpl * SQLServer.dll (dll file) * SQLServer.rc (resource file) * SQLServer.zip (archive file) * SQLServerDotNET.exe (main application executable) * SQLServerDotNET.dll (dll file) * SQLServerDotNET.manifest * SQLWizard.lnk The main application is SQLServerDotNET.exe. This is the main application file of this project. If you want to add some new features in your own project, please go to SQLServerDotNET.exe. You can use all the resources that are in SQLServer.zip, and add them to your own project. But you must make sure that you add 'SQLServer.dll' as a reference in your own project. You must add a reference to the SQLServer.dll file in your own project. It is recommended that the installation folder of the application is separated from the installation folder of the project. If the application is executed, it will be automatically installed in SQLServer.exe folder. To keep the application installed in the installation folder of the project, you must install it to SQLServer.exe installation folder. You can check the main application file SQLServerDotNET.exe in the installation folder of the project. The application can be executed, even if it is not installed in SQLServer.exe installation folder. C:\Program Files (x86)\Microsoft SQL Server\90\Tools\Binn\SQLServer.exe
