Noah's Arc is a 3D platformer video game for iOS and Android. In gameplay, players pick up a virtual chimp to help him traverse across different environments via a series of challenges and puzzles. The game has also reached web version where players play through narrated comic strips. Players may also act as the ape character during the game's story mode. The game was announced in June 2011 with an official release in April 2012. The game was released under the name Chimp Adventure in the United States, Europe, Australia, and Asia, and as Noah's Arc in the rest of the world. Story The game follows a training period for an ape named Noah in one of three forest environments; a cave, a jungle, or an urban environment. The player character, the ape Noah, starts the game by picking up a chimp character with "a bunch of stupid commands". Hovering the player character, the chimp, over a series of obstacles or puzzles, leads the chimp to a treasure chest which enables the player to advance further into the story. The world is illustrated with three-dimensional models and animated 2D cutscenes. Throughout the game's story mode, each ending is presented as a sequence of three-panel comic strip. Gameplay The game follows a traditional platforming mechanic in a series of 3D environments which are accessible through an isometric view. The chimp is able to move in any direction, and jump over and through obstacles. To progress through the levels, the player controls the chimp across a series of challenges or puzzles. The player must aid the chimp in moving through the environment and completing the challenges and puzzles. When the player moves in the correct direction and the chimp lands on a certain object, the player receives an objective. Using the chimp in this manner provides the player with a way to manipulate the environment. The chimp can carry crates and manipulate small objects using his nose. The player must use the chimp to make the chimp use crates and objects to advance to certain areas. When the player completes a challenge or puzzle, they will advance further through the story. The story-mode is separated into three chapters; the cave, the jungle, and the city. Like in other games in the genre, the game's levels are divided into areas named "levels", "locations", and "puzzles". Development Development on Noah's Arc began in late 2010
